SODIUM SULPHITE AND THIOSULPHITE (Na2 SO3) (CAS NUMBER-7757-83-7) TABLET

I propose a sodium thiosulphate (Na2SO3, CAS NUMBER- 7757-83-7) tablet in 500 mg or as per the requirement of the customer to repeal all species of snakes and elephants or wild animals. although the dry sodium sulphite id odourless but the moist sodium sulphite or thiosulphite powder releases the SO2 gases or burning match smell which is highly repealing to nearly all species of snakes and wild animals which may save the life of any unfortunate incident when any person goes for work on village interior or shaded area where encounter with such deadly animals are possible. sodium sulphite inside the sealed blister or sealed pack remains safe and may prevent any possible oxidation thus will have a long life. The smell of burning stick reminds the wild animals like they are amidst burning trees.
